Forecast for Saturday 06 Aug 2022

Weather: A cool start to Saturday underneath largely clear skies. The risk of some mist and fog patches forming in the valleys through the early hours but quickly clearing after dawn. Staying dry throughout the day with prolonged periods of strong sunshine. Some higher-based cloud may turn the sunshine hazier at times, more widely so for the evening and turning cloudier into the night.

Chance of cloud-free hill tops above 800m: 90% or greater.

Low Cloud and visibility: Isolated mist and fog patches in the valleys will lower visibility to poor during the early hours. Cloud will be largely above the summits, though patches around 900m may temporarily shroud the highest summits. Otherwise, visibilities will largely be excellent with clear views of distant hills.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View
A great day to be out on the hills. UV levels will be high so be sure to wear appropriate skin protection.

Forecast for Sunday 07 Aug 2022
Weather: Staying dry throughout Sunday. Early cloud breaking through the morning to allow for another day of prolonged sunny intervals. Clear intervals remaining into the night.

Maximum wind: 8mph northwesterly winds on the hills.

Chance of cloud-free hill tops above 800m: 70% in the early hours, rising to 90% or greater from mid-morning.

Low Cloud and visibility: Cloud around 800-900m through the early hours could shroud higher summits. As it breaks up, a little mist may reduce visibility in valleys under proceeding clear intervals, but clearing soon after dawn. Visibility will largely be very good from mid-morning with any cloud above the summits.

Temperature: **Valleys:** Plus 9 Celsius, rising to plus 21 Celsius.
At 800m: Plus 7 Celsius, rising to plus 10 Celsius.
Freezing level: Above the summits.
